

Creating a Sustainable Transportation Vision for the 21st Century

Presents the Fourth Annual

AltWheels Fleet Day

(advance sign-up required)

A Fleet Managers Symposium on Commercially Available
Light-, Medium-, and Heavy-Duty Alternative Vehicles

Monday, September 29, 2008

8:30 am - 3:30 pm including optional test-drives and workshops

Breakfast and Lunch served

**Held at Staples Worldwide Headquarters
500 Staples Drive, Framingham MA 01702**

Co-Hosted by NAFA Fleet Management Association's New England Chapter and others*

*Best practices for surviving and managing
in an over \$140/barrel world*

*Hear from other fleet managers about powerful ways
to save fuel costs, explore currently available and
next generation technologies, as well as likely tax
credits and mandates.*

*Try and experience a range of solutions
that have saved \$\$\$*

Fee per person to attend AltWheels Fleet Day:

\$75 - Corporate Fleet (\$100 after Sept. 10th)

\$65 - Municipal Fleet (\$90 after Sept. 10th)

\$40 - NAFA/Co-Host member* (\$65 after Sept. 10th)

Act Fast - Last Year's Fleet Day Sold Out!

Creating a Sustainable Transportation Vision for the 21st Century

If you are a fleet manager dealing with fuel costs heading to \$5 or even \$7/gallon, come to AltWheels Fleet Day to learn how to achieve maximal energy efficiency and emissions reduction for your fleet.

- Join fellow fleet managers and explore ways to reduce costs while also reducing your fleet's impact on the environment.
- Learn techniques that make a big difference from companies like Staples, Coca-Cola, Johnson & Johnson; and communities like Boston, Worcester, and Keene, New Hampshire.
- Hear about the latest and greatest technologies and vehicles, both currently available and coming soon, including alternative fuels, hybrids, electrics, idle reduction technologies, and more.
- Leave with a list of items you can implement quickly, starting with three pages of fuel saving tips that work.

Join corporate and government fleet-managers, at this showcase of cutting-edge vehicles and response to the problem of high gas prices.

Alternative Transportation Facts

- **Transportation currently accounts for about a third of greenhouse gas emissions in the U.S.**
- Alternatives to the gasoline-powered automobile have been around since the 1800s.
- **Current technological advances create the real possibility of commercially available zero emission vehicles.**
- The average vehicle sold in the U.S. last year got fewer mpg than the Model T was able to achieve in 1914.
- **New England is a center for alternative transportation technology with:**
 - largest concentration of fuel cell companies
 - largest biodiesel provider in North America
 - cities & towns that have already committed to converting parts of their municipal fleets to more fuel efficient vehicles

AltWheels Fleet Day has drawn participants from more than 7 states and 20 cities, as well as many corporate fleets with its mix of latest technologies, education, practical resources, and networking opportunities.
