About Us - Fleet Electrification Experts

Background

ZEV is an Arizona-based Electrification technology company with **(20+) Battery and Powertrain patent pending technologies**

EV Software Enablement

In-vehicle and cloud telematics software to push near and real-time data to your Vehicle Operator, and Fleet Management system

Service & Support

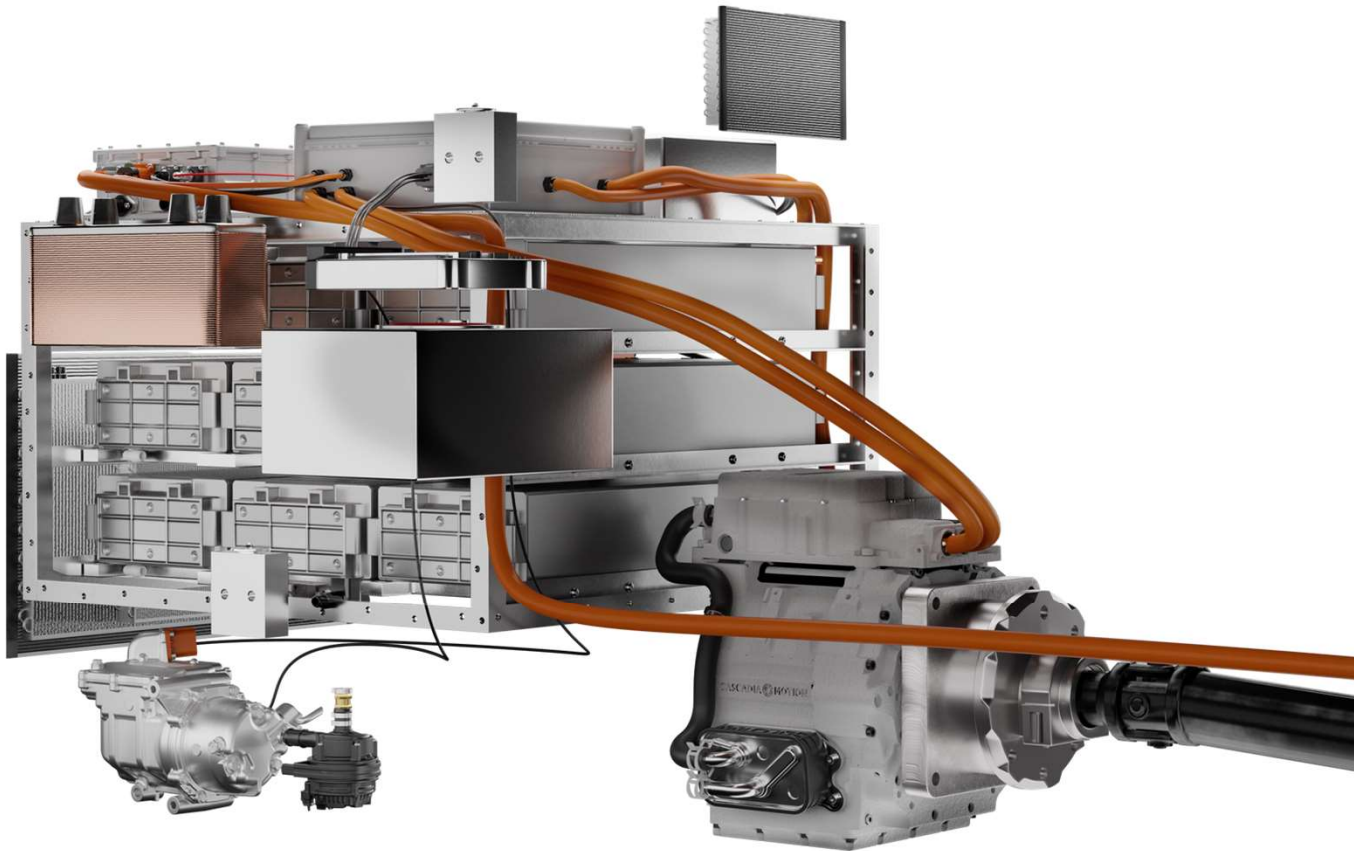

With a National support and service network to help our clients move forward with **electrification of your current light-medium duty fleet vehicles today!**

Team

Led by a **robust STEM team from AZ State Univ, the Auto Industry**, and the Wireless Telco industry - 40+ years helping Verizon, AT&T and numerous acquired companies succeed in wireless data services.

We are committed to helping our **Customers transform their fleet** and buildout productive EV fleet operations well before OEMs deliver new fleet vehicles in volume (2024).
