

Lasell College XL Hybrid Initiative

In 2015-2016, a \$34,000 MA DOER Grant enabled the college to install XL Hybrid technology on 5 vehicles

3 Chevrolet 2500
Passenger Vans

2 Ford Shuttles

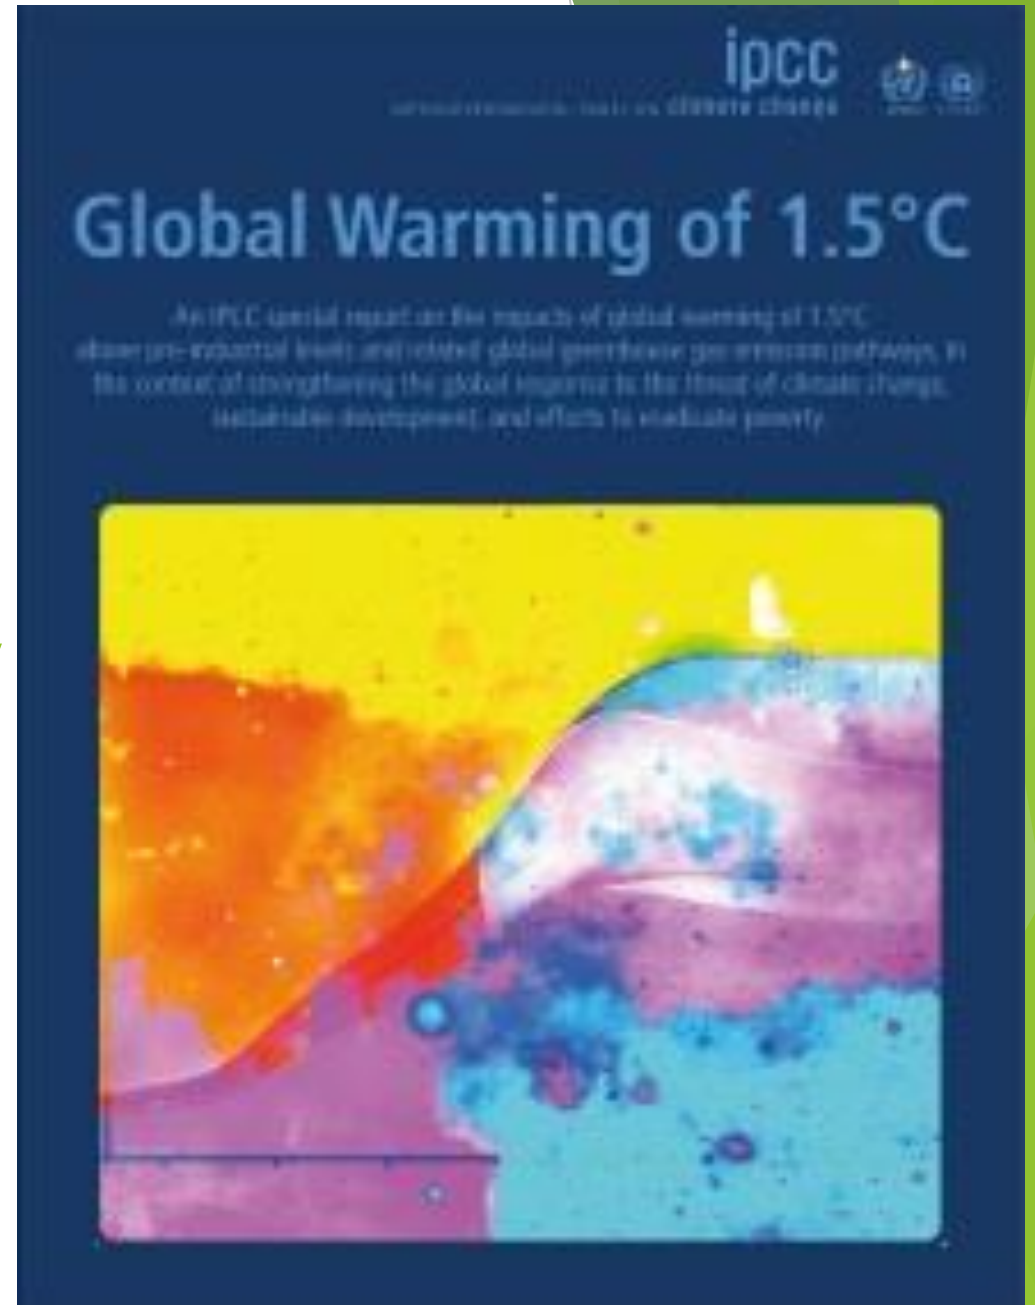

Success expands into
other vehicles on campus!

We hope to install
XL Hybrid
technology on
Ford vehicles at
the Andover DPW
soon

The latest Intergovernmental Panel on Climate Change (IPCC) report on global warming makes grim reading. Why we really need to be doing this now...
