Industry Leaders  
 Fleet Manager Led Panel Discussions  
 Keynote Speakers

Ride and Drive Opportunities  
 Latest Technology and Solutions  
 Networking

AltWheels is the premier annual event in the Northeast promoting alternative and sustainable transportation solutions for fleet managers.

**Morning Keynote Speaker**

**Meet Our Keynote Speaker**

Britta Gross  
 Director of Transportation  
 Electric Power Research Institute

Overall State of Where we are in the Energy Transition

[www.altwheels.org](http://www.altwheels.org)

AltWheels Fleet Day is an annual sustainable transportation event that brings together corporate and municipal fleet managers and clean-fleet stakeholders working to reduce emissions, increase reliability, and lower costs for tomorrow's transportation needs.

- Keynote Speakers
- Lunch with Experts
- Presentation of Awards
- Vehicle Showcase and Ride & Drive Opportunities
- Full set of Exhibits
- Networking Cocktail Hour
- Panels

**Afternoon Keynote Speaker**

- **Fleet Operations Managers: Managing the Energy**

**Meet Our Keynote Speaker**

Mike Scarpino  
Transportation Project Engineer at  
US Department of Transportation

Update on the NEVI  
Funding Awarded in  
the Northeast

- Transition**
- Navigating the Energy Transition: What is Coming Down the Pike
  - Bridging the Gap – Renewable Solutions
  - Innovations and Tools around Charging
  - Electrifying at Scale is Hard: How do Fleets and Utilities get from Here to There?

**Vehicle Showcase**

There will be over 20 vehicles for static display and ride and drive opportunities. Below are two highlighted vehicles at this year's AltWheels Fleet Day.

**BOLLINGER MOTORS**

**ELECTRIC HEART. DETROIT SOUL.**

The all new, all-electric Bollinger B4 – designed, engineered and assembled in the Motor City. Built for your business.

**THE BOLLINGER B4 CHASSIS - BETTER PROTECTION & PERFORMANCE.**

The Bollinger difference can be found in our proprietary, purpose-built commercial EV chassis,

**Click Here to Nominate Someone for Sustainable Mobility Leadership Award Nominations**

**Help us by making your nominations by August 31 for this year's winners.**

**Admission includes a full breakfast, a full lunch buffet, networking, ride and drives, speaker sessions and a cocktail hour.**

**Admission fees will be as follows:**

**General Admission**  
Now - Sept. 15  
\$90

**Late Admission**  
Sept. 16-October 7  
\$125

**Friend of AltWheels**  
\$200

**SPECIAL**

offering the ultimate in protection, performance, and versatility.

- 40"-wide frame rails, compared to the traditional 34", provides the ideal space for securely housing and protecting the dual Our Next Energy (ONE) Aries LFP batteries and components between the rails. No saddle bags here.

- Batteries and components within the frame ensures weight is centered and low, resulting in improved driving dynamics.

- The B4's Quad-Bend, tapered frame enhances maneuverability, allowing a 40" frame to turn like a 34" frame, resulting in a tight 46' turning radius.

### ANY UPFIT. NO PROBLEM.

Flat frame rails streamline upfits with minimal customization required, leading to faster turnaround times. If your truck needs some extra juice, add the optional e-PTO unit.

### EASIER MAINTENANCE = MORE UPTIME

When maintenance or repairs are needed, all components, including batteries, are easily accessible from below the frame, creating less downtime for your trucks.

### BOLLINGER B4: GREAT TRUCK. GREAT VALUE

We're confident the 2025 Bollinger B4 is the right truck for your fleet, but if you need a little more convincing, our truck qualifies for a \$40,000 IRS tax credit, and will soon qualify for HVIP and other incentives. Talk with your Bollinger Motors representative or Dealer for more information.

**Revant Motors** offers a cost effective electric-retrofit solution for gasoline fleet vehicles without compromising any of their original features. Our proprietary solution seamlessly **integrates off-the-shelf electric powertrains** to gasoline fleet vehicles and decarbonizes them efficiently thereby significantly reducing operating costs and extending usable life.

Our **prototype implementation**, shown here at AltWheels 2024, demonstrates a 50 KWh (220 miles range) battery with a 225 KW Borg Warner motor stack (300 HP) integrated to a 2003 Porsche 911 Carrera 4S seamlessly (bolted on) using the proprietary **Revant Arbiter** chip. All the original car's features including

its stability management, safety, 4-WD transmission and instrumentation operate as before in synergy with the **off-the-shelf electric powertrain** to demonstrate elegant upcycling and 100% de-carbonization with significantly reduced operating costs. This solution can easily be bolted on to fleet vans or pick-up trucks to cost effectively extend their usable life while significantly reducing their operating costs.

We've spent years developing complete solutions for electromobility. No OEM is more qualified to help you with the vehicle, service contract, financing, and charging infrastructure you'll need for tomorrow's electric fleet. As the global leader in zero-emission electric trucks, Volvo is committed to reducing pollution, noise, and traffic on crowded urban streets.
